

**Research carried out by ScotPulse  
for Mark Diffley Consultancy  
Policing Covid-19 Wave 2**

**May 2020**

**Tables**

- 1 Since the lockdown measures came into effect, how would you best describe your own degree of compliance with public health guidance?
- 2 Thinking about the length of the lockdown, which of the following comes closest to your viewpoint?
- 3 If the lockdown continues to apply to all people equally in Scotland in the weeks ahead, how likely is it that you will comply with the public health guidance on staying at home and avoiding unnecessary travel?
- 4 Which of the following most closely describes your main reason for deciding on whether to comply with the public health guidance on staying at home and avoiding unnecessary travel?
- 5 Supposing the public health guidance is relaxed so that some people have more freedom of movement, for example because of their age or because of where they live, how likely is it that you would continue to comply with the guidance if it is not relaxed for you?
- 6 Which of the following statements best describes your current personal status regarding the Coronavirus / Covid-19 lockdown?
- 7 Taking everything into account how good a job do you think the police in your local area are doing?
- 8 How confident are you in the ability of police in your local area to respond quickly?
- 9 How confident are you in the ability of police in your local area to deal with incidents as they occur?
- 10 Overall do you think that the police presence in your local area is?
- 11 Which of the following statements comes closest to your view of how the police in Scotland are handling the COVID 19 lockdown?
- 12 To what extent are you comfortable or uncomfortable with each of the following police measures in response to COVID-19?

Sample

**Fieldwork & methodology**

Surveys were online with invitations to a sample of the ScotPulse panel representative of the Scottish population

Survey invitations were sent on 12th May, with results analysed on 17th May

A total of 1575 complete responses was received.

Results were weighted to the Scottish adult population by gender and age.
